**Balfour Beatty Infrastructure Awarded Contract
for Bridges Over Little Pee Dee River**

(MULLINS, S.C.) – The South Carolina Department of Transportation has awarded Balfour Beatty Infrastructure, Inc. a three-year contract to replace two bridges over the Little Pee Dee River in Mullins, S.C. The team will also realign the roadway to accommodate the bridges.

Work is set to begin in December 2010. To keep traffic flowing during the \$12.8 million project, Balfour Beatty Infrastructure will perform work in phases. The completion date for the project is November 2013.

“The Little Pee Dee River is an ambitious and environmentally sensitive project,” said Ray Bond, president and CEO of Balfour Beatty Infrastructure. “Our project teams have deep experience and an excellent track record working at sites such as this. We expect this job to go smoothly for all parties involved.”

The two bridges measure 1,080 and 540 feet long. The former, supported by drilled shafts, will extend over a wetland area. The latter, supported by pile, will span the river itself.

“In addition to the ecological concerns, there will also be a fish moratorium, which is a period when we’ll be prohibited from doing any work in the water,” said Mark Johnnie, vice president of the Southeast Region. “We faced the same kind of restriction on the Trent River Bridge project in New Bern, N.C., which we recently and successfully finished. It requires careful planning and we’re ready for the challenge.”

The Little Pee Dee River is a tributary of the Pee Dee River, which begins in the Appalachian Mountains.

Balfour Beatty Infrastructure, Inc. delivers industry-leading civil engineering and construction expertise for transportation and water infrastructure projects throughout the United States. With more than 1,000 employees in major operations in California, the Carolinas, Pennsylvania and Texas, Balfour Beatty Infrastructure boasts annual revenues of more than \$400 million. An award-winning contractor, Balfour Beatty Infrastructure recently received the AGC of America’s 2008 Marvin M. Black Excellence in Partnering Award and is recognized by Engineering News-Record as one of the “Top 20 Transportation Contractors” and “Top 50 Domestic Heavy Contractors” for 2009. Balfour Beatty Infrastructure is part of Balfour Beatty plc, a global engineering, construction, services and investment business organization specializing in large infrastructure and building programs.
