Fru-Con Construction, LLC, a wholly owned subsidiary of Balfour Beatty Infrastructure, Inc., is among the oldest contractors in the United States and a major player in the construction of water and wastewater treatment plants.

With its main office in Woodbridge, VA, Fru-Con operates in Virginia, Maryland and Washington, D.C. Recent water and wastewater infrastructure projects include the Arlington Water Pollution Control Facility and Broad Run Water Reclamation Facility.

Balfour Beatty Infrastructure acquired Fru-Con Construction in 2011.

Treated water flows from the Broad Run Water Reclamation Facility in Ashburn, VA, near the Potomac River. Fru-Con built preliminary and primary treatment facilities, as well as the administration and operations buildings.

Fru-Con performed a major upgrade and expansion of the Arlington Water Pollution Control Plant in Arlington, VA. The upgrade vastly improved the plant's ability to remove nitrogen from the water, helping safeguard marine life in Chesapeake Bay.

## The creation and care of essential assets
