The Southwest Region office of Balfour Beatty Infrastructure, Inc. serves Texas, particularly the major metro areas of Houston, Austin and Dallas. The Southwest teams specialize in complex phased highway projects for public works agencies.

Balfour Beatty Infrastructure is recognized as a structure and concrete-paving specialist in the Southwest Region. The teams provide construction services for existing highways, as well as new alignments. They are also experts in constructing retaining walls and railroad structures.

Balfour Beatty Infrastructure received safety honors for its work on Texas highways. Every year since 1994, the Associated General Contractors of Texas (AGC) has honored the company for its safety record. The AGC also awarded the company the Texas Award for Project Cooperation in 2007 for its partnership on construction of the I-35 and State Highway 121 interchange.

Major improvements to the Dallas North Tollway won Project of the Year honors from the Texas Chapter of the American Public Works Association, bestowed in 2005.

Balfour Beatty Infrastructure is part of the Lone Star Infrastructure joint venture that completed SH130. One of the largest public works projects in U.S. history, the SH130 project included 49 miles of Texas State Highway in Austin with more than 140 structures and toll facilities.

The creation and care of essential assets
